DETAILED ACTION

Response to Amendment

1. The Examiner has carefully considered Applicant's amendments and accompanying remarks dated 02/12/07. Applicant's amendments to the claims have been entered into the file. Applicant's arguments have been fully considered and are persuasive. Therefore, all previously made rejections are known withdrawn. However, upon further consideration, a new ground(s) of rejection is set forth below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 4-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specially, Claim 1, recites the limitation "elastic component 'G'" in line 6. There is insufficient antecedent basis for this limitation in the claim. With regard to claims 4-27, they are objected to as being dependant upon a rejected base claim.
